- March 2005-
September 2005 (6
months)** **Fellow (specialist assistant) in ENT Department King
Abdullah University Hospital, Irbid-Jordan.**
- July, 2000 - June, 2004
(4 years)** **Resident (SHO) in E.N.T. Department, Jordan
University Hospital, Amman-Jordan
The E.N.T. Residency program is a 4 year Training
program involving rotations in Otology, Audiology,
Rhinology, Laryngology and Head and Neck Surgery.
In addition to a 12 month rotation in General
Surgery.**
- July, 1999 - June, 2000
(1 year)** **Intern (Rotating house officer) At Al-Zarka Hospital,
Zarka-Jordan.
Rotations included: Internal Medicine, General
Surgery, Pediatrics, Obstetrics and Gynecology,
Emergency and Trauma**

PROFESSIONAL EXPERIENCES:

I joined the ENT residency program in Jordan University Hospital, Amman-Jordan following a competition exam. During my first year stay in the general surgery department I rotated in gastrointestinal surgery (2 months), surgical oncology (2 months), vascular surgery (2 months), plastic surgery (2 months), cardiothoracic surgery (2 months), and emergency room (2 months).

Then I rotated in Otology, Rhinology, Laryngology and head and neck surgery during my 3-year stay in ENT department. I passed all the exams at the end of each year, which is mandatory to continue in the program, and I passed the final exam that allowed me to have the

Certificate of Higher Specialization in Otorhinolaryngology from the University of Jordan.

I also passed the exam held by the Jordan Medical Council and I got the Jordanian Board of Otorhinolaryngology.

During that time I have been involved in the management and care of surgical patients in the E/R, wards, clinics, day care units and in the operating theatres.

This included care and management of patients in the general surgery clinics and in ENT clinics, care of patients in the wards (pre- & post-operatively), management of almost all general surgery and ENT emergencies in the E/R and finally I was involved actively in doing most of minor and major operations with gradually increasing responsibility and experience.

My training was comprehensive for most of the ENT fields.

I presented many lectures, cases, journal reviews, audits and basic science topics.

I was the Chief Resident during the year 2003/2004 and I was responsible for coordinating the residents' work and management of their current problems.

All this experience was at Jordan University Hospital, the hospital of the University of Jordan/Medical School, a tertiary referral center that has a total of 600 beds.

Then I joined King Abdullah University Hospital, the hospital of the University of Science and Technology /Medical school, as an ENT fellow since march 2005.

The responsibilities were almost the same but with little increase in the mean of supervision and teaching of both students and residents and more time in the operating room.

Since September 2005, I joined the faculty of medicine in Mutah University as the only lecturer in the ENT department. Also I worked as an ENT specialist in Karak Teaching Hospital. I had the responsibility of teaching the 5th year medical students the ENT course, also I did teach the 4th year medical students the introductory course (a summer course that cover all the systems' history and physical).

At the end of September 2007, I joined the department of otolaryngology – head and neck surgery at Stanford University, USA as Visiting scholar. I started clinical and research training. The research was focused on the ototoxicity of gentamicin. I gained various skills including: tissue cultures, immunohistochemistry and use of both confocal and 2 photon laser microscopy imaging.

At the end of November 2009, I went back to Jordan to join the department of special surgery, Mut'ah University as Assistant professor. I teach the 5th year medical students a 2 week rotation of ENT. And I work as consultant of ENT at alkarak teaching hospital.

I filled the position of vice dean for clinical training at September 2016 for a one year. During which I have been responsible for the monitoring of clinical training of the medical students in the different teaching hospitals.

After that, I have been the vice dean for clinical affairs for two years, 2017-2019. During this period I have been responsible for the clinical building of the college of medicine, Mutah University. This building has more than 900 students in the three clinical years and more than 100 staff who teach them. I have been responsible for all the issues that are related

to this building including but not limited to : arranging teaching schedules , arranging clinical exams, distribution of students to different teaching hospitals and the coordination between the university and the teaching staff from outside the college.

TEACHING EXPERIENCES:

- Active involvement in the teaching rounds and seminars for the medical students and residents, also teaching operative skills to senior & junior residents.
- Preparation and coordination of the Clinical Examinations for the residents and medical students.
- Teaching at research lab: tissue culture, immunohistochemistry and imaging.

SCIENTIFIC COURSES:

- **Temporal bone dissection course – Amman, Jordan. 8th-10th September 2003 – Participant.**
- **Safe Shipping of Biological Materials, Stanford University, USA. February 25, 2008.**
- **TEP (tracheo- esophageal prosthesis) course, hands on, Stanford University, USA. 25th&26th April 2008.**
- **Research Administration Cardinal Curriculum Level 1, Stanford University, USA. March 13, 2009.**
- **Research Administration Cardinal Curriculum Level 2, Stanford University, USA. March 16, 2009.**

- MEMRO (Middle Ear Mechanics in Research and Otology) Fifth International Symposium Stanford University, USA. June 24-28, 2009.
- 7th Molecular Biology of Hearing & Deafness Conference, Harvard Medical School, Boston, USA. June 20-23, 2009.
